

Life Of Journey

Presented By :

NITESH GHUBDE FSWD_03

PROBLEM STATEMENT

- The purpose of websites is fact that internet users are increasing today. Today One of the main purposes of the website is for a user can directly come on my website visit the tour places, And plan where want to go to which destination.
- destination-based comprehensive investigations into tourist behaviour need to be further conducted.
- which will help to come to an overall understanding of tourist behaviour in relation to development of tourism resources.
- Checking on which destination is more popular how's is rating for this .

Market research and the need to have this project

- Due to this project, many things became easy because people can easily find where to visit the tourist place.
- No need to search on google they come directly to my website and check here where to go.
- You can come here and see which place is famous and get complete information.
- You can see the rating of this place, how many people have seen it.
- It's fully responsive, you can easily access it on mobile.

FUTURE SCOPE

- Any tourist agency can make use of it for saving customer details in database.
- Tourism group can use it for managing their location, hotel, vehicles details.
- This application can easily implemented under various situations.
- We can add new features as and when we require.
- Reusability of this application is also possible.

CONCLUSION

- Travel and tourism management" simplifies the management process in travelling.
- Fast processing and immediate results with high security.
- Minimizing human effort and cost efficient databases.
- Navigation through the site is easy.
